PROFESSIONAL SUMMARY

Full Stack Developer specializing in the **MERN stack, Java, JavaScript, C++** with hands-on experience shipping **3 production web/mobile applications** and building an **AI-powered interview platform** using the Google Gemini API. Skilled in designing secure, scalable REST APIs (JWT auth), building responsive UIs with React.js and Tailwind CSS, and integrating Generative AI into product features. Solved **300+ DSA problems** on LeetCode. Seeking a Full Stack Developer role to build high-impact, user-facing products.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript (Basic), C++, Kotlin
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST API Design, JWT Authentication
Databases: MongoDB, MySQL
Mobile: Kotlin, Android Studio
AI / Tools: Google Gemini API (GenAI integration), Git & GitHub, Postman
CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS

WORK EXPERIENCE

App Developer Intern (Remote) — *MindMatrix* Feb 2026 – May 2026

- Built scalable Android applications in **Kotlin** using Android Studio, applying modern UI and MVVM-aligned architecture practices to improve maintainability.
- Integrated **Generative AI APIs** to power context-aware in-app features, increasing user engagement with intelligent, personalized functionality.
- Designed and consumed **RESTful APIs** for client-server communication, and optimized app performance to reduce load times and improve responsiveness.

PROJECTS

InterviewMaster — AI Interview Preparation Platform (*Live*) | [Demo](#) | [GitHub](#) Feb 2026

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Google Gemini API, Tailwind CSS

- Built a full-stack AI platform that analyzes candidate job-readiness, used to generate personalized prep plans from resume and job description input.
- Implemented **JWT-based authentication** and scalable REST APIs for secure, multi-user account management.
- Integrated the **Google Gemini API** for resume-to-job matching, automated skill-gap analysis, and AI-generated technical/behavioral interview questions tailored to the role.

Delish — Restaurant Web Application (*Live*) | [Demo](#) | [GitHub](#) Jan 2026

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST APIs

- Developed a full-stack restaurant platform with live menu display, services overview, and an end-to-end table reservation system.
- Built a fully responsive React.js UI with fast load times and an intuitive booking flow; designed REST APIs with Node.js & Express.js and MongoDB schemas for reservation data.

Paste App — Code Snippet Manager (*Live*) | [Demo](#) | [GitHub](#) Dec 2025

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, MySQL

- Built a code/text snippet manager in React.js with create, edit, and organize functionality to boost developer productivity.
- Implemented centralized state management with **Redux Toolkit** for predictable, scalable data flow.
- Designed a responsive Tailwind CSS UI with reusable components for scalability and performance.

ACHIEVEMENTS & CERTIFICATIONS

- AICTE–Edunet Certified: **Building Modern Web Applications with the MERN Stack** ([Certificate](#))
- Solved **300+ DSA problems** on LeetCode ([Profile](#))

EDUCATION

B.Tech in Computer Science & Engineering 2022 – 2026

City Engineering College (VTU), Bengaluru | CGPA: 8.1/10
